

# "Nature's Superheroes"

Do you know the protectors of the planet?

Superheroes come in all shapes and sizes and while often times being very misunderstood they help those in need while making the world a better place. Nature on the GO! has paired hands-on activities, games and small live animal observations with a visual presentation to help participants learn:

- Why TREES are TERRIFIC
- Who are the ORIGINAL RECYCLERS
- How POWERFUL are POLLINATORS  
AND
- Which critters FIGHT the ENEMY by preying on pests

Connections will also be made between nature's superheroes and how people can step up to be superheroes for nature!

Follow-up activity guides will be provided for families to take home.
